WORK EXPERIENCE

GoHighLevel Team Lead, Ignitto January 2025 – Present

- Lead a small GoHighLevel automation team, training and onboarding multiple interns into production-ready funnel, workflow, and integration builders.
- Audited and rebuilt a chiropractic clinic's patient-acquisition funnel, resolving critical mobile UX, lead-capture, and compliance failures ahead of a paid traffic launch, then built an automated SMS recall workflow integrating GoHighLevel with Practice Hub to eliminate manual missed-appointment follow-ups.
- Rebuilt a large-scale (tens of thousands of contacts) CRM database for a coaching business, removing broken automations and re-segmenting the list to support a full website and lead-generation relaunch.
- Deployed a white-labeled GoHighLevel and Instantly.ai outbound system for an eLearning agency, running a multi-week cold email campaign that delivered an above-average open rate and generated meaningful new pipeline.
- Built an intake-to-pipeline automation for a digital marketing agency with conditional routing and automated reminders, significantly cutting administrative follow-up time and client onboarding time.
- Designed and deployed an AI-powered patient chatbot and landing page for a healthcare client, driving a strong increase in consultation requests within the first month while meaningfully cutting front-desk call volume.

SELECTED CLIENT PROJECTS

Patient Lead & Follow-Up System — Physiotherapy Clinic

Organized several hundred patient leads into GoHighLevel and replaced manual PDF emails with automated delivery; built a set of condition-specific follow-up email paths to increase patient trust and retention.

24/7 AI Assistant & Multi-Channel Inbox — Wellness Business (Germany)

Implemented an AI chat assistant for instant customer responses and unified WhatsApp Business and email into a single inbox, reducing missed appointments and admin overhead.

Automated Lead Nurture Engine — CPA Accounting Firm

Built intent-based nurture workflows and a visual sales pipeline that drove a steady stream of automated bookings and an above-average email open rate while tracking dozens of active leads.

Coaching Ecosystem Build — Multi-Offer Education Business

Built a full GoHighLevel infrastructure spanning multi-funnel lead generation, course and membership delivery, and Zapier/Pabbly automations, including an automated Fathom-to-Slack meeting notes pipeline and automated SaaS sub-account provisioning.

EDUCATION

BS, Information Technology — Bahria University 2024
